SUMMARY

Aspiring DevOps Engineer with hands-on experience gained through an intensive cloud-based internship and practical DevOps projects. Skilled in Linux administration, Docker, Kubernetes, Git, GitHub Actions, Jenkins, AWS fundamentals, Bash scripting, Python, and infrastructure automation. Completed extensive hands-on labs in a simulated enterprise cloud environment covering containerization, CI/CD, observability, and Linux automation. Passionate about cloud-native technologies, automation, and continuous learning while building real-world DevOps solutions.

EDUCATION

Al-Nafi International College

Diploma in Devops and Cloud Advancement

2025 - 2026

EXPERIENCE

DevOps & Cloud Job Training Program

Al Nafi International College

June 2025 – June 2026

Completed an intensive hands-on-internship conducted on Al Nafi Cloud Platform, a cloud lab environment designed to simulate enterprise IT infrastructure and real-world DevOps workflows. Successfully completed practical assessments and achieved consistently strong performance across multiple DevOps labs.

RESPONSIBILITIES

- Built and deployed containerized applications using Docker and Docker Compose.
- Worked with Kubernetes and OpenShift to deploy and manage containerized workloads.
- Configured OpenShift Service Mesh and explored traffic routing concepts.
- Implemented centralized monitoring and metric collection for real-time system visibility and performance.
- Practiced CI/CD workflows using modern DevOps tools.
- Automated Linux administrative tasks using Bash scripting.
- Performed Linux system administration including users, permissions, networking, and process management.
- Implemented infrastructure automation using Ansible.
- Worked with AWS cloud fundamentals in practical lab environments.
- Collaborated in practical DevOps scenarios using Git and GitHub.
- Improved troubleshooting skills by analyzing logs and resolving deployment issues.
- Maintained technical documentation for lab exercises and projects.

SKILLS

TECHNICAL SKILLS

Operating Systems

- Ubuntu Linux
- CentOS Linux / RHEL

Cloud

- AWS (EC2, IAM, S3, VPC, EKS, Route 53, CloudWatch)

Version Control

- Git
- GitHub

Automation & Infrastructure as Code

- Bash
- Python
- Ansible
- Terraform

Containers & Orchestration

- Docker
- Docker Compose
- Kubernetes
- OpenShift

CI/CD

- Jenkins
- GitHub Actions

Monitoring & Observability

- Prometheus
- Grafana

Networking

- SSH
- DNS
- HTTP/HTTPS
- TCP/IP
- Linux Networking Fundamentals

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Documentation
- Continuous Learning
- Adaptability
